Sean Van Slyck, M.P.A.,
CPTC

Darnell Waun, Patient
Advocate

General Information

Restrooms

Water & Coffee

Charging Station

OPTN

Today's Goals for the Community

Continue conversation about possibilities for improving liver distribution to reduce the geographical disparities across the country.

Share information and perspectives on recent changes to distribution policies, the potential opportunities for and challenges associated with improving patient access.

Share input about the possible directions for policy development and what efforts would be important to support any improvements.

OPTN

Today's Goals for the Committee

Discuss and get further community input on several concepts aimed at improving distribution.

Explore additional research and feedback that will help evaluate any future options.

Today's Intended Outcomes

Greater understanding among all stakeholders about the hopes and concerns associated with liver distribution and the existing geographical disparities.

Greater understanding of distribution concepts that do and do not resonate with the community at the current time.

Greater understanding of desired directions for further work.

What today is NOT

A
Debate

A final
decision

Today is not intended to promote any
specific policy proposal.

Rules of Engagement

Cell phones & pagers on **SILENT.**

Move side conversations outside
the meeting room.

Disagree without being disagreeable.

Speakers will be held accountable for their
allotted time.

Rules of Engagement Continued

Questions can be posed in the following manners:

- By participants via the microphones in the aisle
- Emailed to Liver@UNOS.org
- Submitted on 3x5 cards to UNOS Staff

Please keep questions brief, concise, constructive and related to the topic at hand (no more than 1 minute).

Polling, Audience Response

Polling questions based on the Concept Document Questionnaire and information provided today will be asked throughout the day

LiveMeeting participants will be using the polling feature.

TEST your device NOW!

OPTN
