

**Is your pair eligible to participate in match runs?**

There are 2 types of status for KPD donors and candidates:

**KPD Status: *Active, Inactive, or Removed***, is set by the transplant hospital at the bottom of the donor and candidate details page.

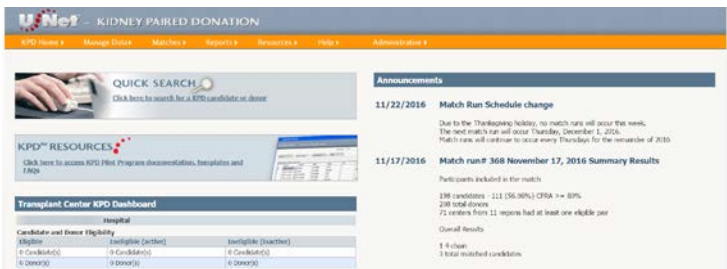

**Candidate/Donor KPD eligibility status: *Eligible or Ineligible***, is automatically set by the KPD system, based on data entered by the transplant hospital. Complete any field marked with \* for a donor or candidate to be eligible to participate in match runs.

**Donors and candidates must be active and eligible to participate in match runs (have the potential to match).**

You can check donor and candidate eligibility status through the dashboard (first page after accessing the KPD widget from Secure Enterprise), the donor/candidate summary page (top left corner), or running a report from the Reports tab.

**How to determine eligibility status**

1. Donors and/or candidates you have listed as 'Active' but are 'Ineligible' to participate in match runs will be highlighted in orange. Select this orange link to view the list of donors and candidates.

**Candidate and Donor Eligibility**

Eligible	Ineligible (active)	Ineligible (inactive)
3 Candidate(s)	7 Candidate(s)	1 Candidate(s)
3 Donor(s)	12 Donor(s)	0 Donor(s)

2. From this list, select the KPD candidate or donor ID and then the **Ineligible** link in the top left corner to pull up a list of specific ineligible reasons

**Candidate KPD eligibility status: *Ineligible***

**Candidate Ineligible Reasons** (KPD Candidate ID: [redacted]) (Waitlist ID: [redacted]) Print

- 1 Candidate HLA and Unacceptables: Values for both HLA "C" fields are required for match eligibility when unacceptables are entered for "C".
- 2 The candidate is associated with a paired donor(s) whose records are missing required data, or there is no donor record. Please view the paired donor(s)' record for more information.

## KPD Tip of the Month December 2016

- Alternatively, go to the Reports tab and choose Ineligible Pairs Report. Use the + and – signs to expand and collapse the Ineligible reasons. Select the donor and candidate ID # to link to the candidate page and edit the record.

Standard Reports

- [Eligible Pairs Report](#) – This report lists the candidate and donor records that are eligible to be included in the KPD match run.
- [Ineligible Pairs Report](#) – This report lists the candidate and donor pairs that are ineligible to be included in the KPD match run and the reasons why a pair is ineligible for the KPD match run.
- [Candidates Report](#) – This report lists all active and inactive candidates in the OPTN KPD Pilot Program. Removed candidates are not included in this report.
- [Donors Report](#) – This report lists all active and inactive donors in the OPTN KPD Pilot Program. Removed donors are not included in this report.
- [Candidate-Based Points Report](#) – This report lists all points each candidate would receive if the match were run on this date. Other points may apply depending on the match between the donor and the candidate.
- [Candidate Antibody Testing Report](#) – This report lists candidate's status for Antibody testing based upon selected criteria.

### Ineligible Pairs as of 11/29/2016 14:35:14

This report lists the candidate and donor records that are ineligible to be included in the KPD match run. Inactive pairs are included in the report, but removed pairs will not be displayed.

Total: 13 Ineligible pairs [Expand All] [Collapse All]

KPD pair ID	KPD candidate ID	Candidate name	Candidate's KPD status	KPD donor ID	Donor name	Donor's KPD status
			Active			Active
		Ineligible reasons for candidate		Ineligible reasons for donor		
			Active		Donor HLA: Values for both HLA "DQA1" fields must be entered for match eligibility.	Active
			Active			Active
			Active			Active
