Pediatric Kidney Transplant Recipient Registration Worksheet

Note: These worksheets are provided to function as a guide to what data will be required in the online $TIEDI^{(0)}$ application. Currently in the worksheet, a red asterisk is displayed by fields that are required, independent of what other data may be provided. Based on data provided through the online $TIEDI^{(0)}$ application, additional fields that are dependent on responses provided in these required fields may become required as well. However, since those fields are not required in every case, they are not marked with a red asterisk.

Recipient Information		
Name:	DOB:	
SSN:	Birth sex:	
HIC:	Transplant Date and Time:	
State of Permanent Residence: *		
Permanent Zip: *		
Provider Information

Definitions Of Immunosuppressive Medications			OX			
For each of the immunosuppressive medications listed, select Ind	(Induction), Maint (M	laintenance) or A	R (Anti-rejection)	to indicate all m	edications that we	ere
prescribed for the recipient during the initial transplant hospitaliza	tion period, and for wh	at reason. If a m	edication was not	given, leave the	associated box(es	s) blank.
Induction (Ind) immunosuppression includes all medications giv Though the drugs may be continued after discharge for the first 3	0 days after transplant	, it <u>will not</u> be use	ed long-term for in	nmunosuppress	ive maintenance.	
Induction agents are usually polyclonal, monoclonal, or IL-2 recepting might be used for another finite period for rejection therapy	and would be recorde	d as anti-rejection	n therapy if used f	or this reason. I	For each induction	
medication indicated, write the total number of days the drug was apart then the total number of days would be 2, even if the secon				, if Simulect wa	s given in 2 doses	a week
Maintenance (Maint) includes all immunosuppressive medicatic prednisone, cyclosporine, tacrolimus, mycophenolate mofetil, azat rejection episodes, or for induction.						
Anti-rejection (AR) immunosuppression includes all immunosup post-transplant period or during a specific follow-up period, usual	pressive medications g	iven for the purp	ose of treating an	acute rejection	episode during the	e initial
Thymoglobulin). When switching maintenance drugs (example: fr	om tacrolimus to cyclos	porine; or from n	nycophenolate mo			ejection,
the drugs <u>should not</u> be listed under AR immunosuppression, but If an immunosuppressive medication other than those listed is bei				Ind, Maint, or A	AR next to Other	
Immunosuppressive Medication field, and enter the full name of t						<u>.</u>
