

# UNOS<sup>SM</sup>

## ORGAN TRACKING SERVICE

### SAFELY MOVING ORGANS OVER MILES AND MILES IS A FEAT

Organs are moving farther than ever before, and that means sometimes you need hands-on help.

Every mile of travel adds more risk. You need a solution that shows you where your package is, no matter whether it's on land or in the air.

### DESIGNED TO TRIM COSTS, TIME AND STRESS

#### Real-time Information

The UNOS OTS uses GPS and IoT technology to keep you informed throughout the entire journey. Real-time updates and automated notifications ensure that the organ is where it's meant to be.

#### Built with you in mind

Your time is the most valuable resource. We streamline processes with 1-minute shipment creation, TransNet<sup>SM</sup> integration and simple tracking visualizations. When you need us, our staff are available help you succeed.

## UNOS ORGAN TRACKING SERVICE

### How it works

#### Create a shipment

Scan your GPS device and UPS label, then add a shipment to your dashboard

#### Attach your tracker to the package

Your reusable tracker will ping every two minutes along the organ's journey

#### Ship and begin tracking

Follow each package or see a bird's eye view of all packages in transit

#### Receive notifications for each milestone

Notifications keep you and the transplant program up to date on the package's journey

#### Reuse your trackers

Once the package arrives, the transplant program uses the pre-labeled mailer to send your tracker back to be reused again and again

## FEATURES MADE FOR YOU

- Flight tracking allows you to track on land and in air
- Auto-updating ETAs keep you and your transplant programs informed
- Automatic notifications alert you of key milestones in the journey in real time
- Points of interest let you set your own milestone locations, like histo labs or pumping locations
- DonorNet® and DonorNet Mobile™ integration allows programs to track with you
- Personalized training with UNOS staff helps you get tracking up and running fast
- Regular OTS user group meetings let participating OPOs learn from peers and UNOS staff
- User-built enhancement pipeline allows your feedback to shape the ongoing improvement of OTS

## THE UNOS DIFFERENCE

When you choose the UNOS Organ Tracking Service, you gain a *partner*.

Here's what you can expect:

### A cost-efficient solution.

We know you have demands on your budget. As a non-profit, good stewardship is a priority - we keep costs reasonable, then reinvest back into the community.

### Reliable communication.

We are invested in your success. Our staff works with you to train, troubleshoot and resolve challenges

### An eye toward improvement.

We are never satisfied with the status quo, and your input is critical for improvement. Our partnership includes opportunities for fee back and collaboration.

### Unparalleled expertise and accuracy.

Our historical, global field experience is unparalleled. UNOS has spent decades making improvements to every aspect of the donation and transplant system.
