

UNITED NETWORK FOR ORGAN SHARING

**Region 2  
Educational Collaborative  
Thursday, September 5, 2019  
8:30 a.m. – 4:15 p.m.**

A “collaborative” is an effort, on the part of multiple organizations, to come together with faculty to learn about and to create improved processes in a specific topic area. The expectation is that teams share expertise and data with each other; thus, everyone *learns, everyone teaches.*

<b>AGENDA</b>	
8:00 a.m.	<b>Registration</b> *Breakfast provided  <i>Breakfast is graciously sponsored by NORA.</i>

# We appreciate the support of the following sponsors:

## Gold Level Sponsor - CareDx

CareDx, Inc., is a leading precision medicine solutions company focused on the discovery, development of clinically differentiated, high-value healthcare solutions for transplant patients and caregivers.

## Silver Level Sponsor - NORA – Breakfast Sponsor

NORA works with OPOs, Transplant Centers and Laboratories around the country providing the perfect “One Call Solution” solely for Air and Ground Organ Recovery Transportation.

✦ Collaboration ✦ Equality ✦ Teamwork ✦ Commitment ✦  
✦ Communication ✦ Sharing ✦ Responsibility ✦ Love for the Job ✦

## Bronze Level Sponsors

PROMETHERA BIOSCIENCES was established to find new ways to provide safe and effective medical treatments for liver diseases. Multiple products in our portfolio include early stage liver progenitor cells and later stage mature hepatocytes. Therapeutic indications include liver metabolic disorders (such as Urea Cycle Disorders), Acute-on-Chronic-Liver-Failure, Hemophilia, Fibrosis, and NASH among others. The therapeutic programs are in various stages of development from pre-clinical all the way through to the market authorization application stage. We would like to thank our OPO partners and donor families for providing the necessary gift of non-transplantable livers as the source of our cell therapy products.

Sanofi Genzyme is the specialty care global business unit of Sanofi, focused on rare diseases, multiple sclerosis, oncology, transplant and immunology. We help people with debilitating and complex conditions that are often difficult to diagnoses and treat. We are dedicated to discovering and advancing new therapies, providing hope to patients and their families around the world.
